

DASH COVER FITTING INSTRUCTIONS

Clean the dash board thoroughly with a mild soap solution. It is very important to remove all dust, and all silicone-based vinyl cleaning products.

Once dash board is dry and clean, lay dash cover on dash and mark where the Velcro strips are to be affixed.

Now split the Velcro, remove the backing, and stick each piece down in their marked-out positions. Push firmly down.

Wait 24 hours before fixing the dashboard cover to the Velcro.

WASHING AND MAINTENANCE

Wipe off solid waste and liquid spills with a damp cloth – do not rub/scrub!
Vacuum excessive dust/sand.

Hand wash dash cover in cool water (max 30°C) with a soft soap solution (bleach free) - do not rub/scrub!
Stubborn oil stains – soak in cool water with soft soap solution overnight and rinse with fresh water.

Note that the water repellency on the canvas will wash out over time and recommend that you Scotch Guard periodically.

FABRIC

Tuff Canvas is our latest, specially formulated fabric, with exceptionally good technical features. It is tough, water repellent and extremely abrasion resistant.
